REFORM® *Ti*

TITANIUM PEDICLE SCREW SYSTEM

VERSATILITY & VISIBILITY

The Reform® Ti Pedicle Screw System provides surgeons increased flexibility, versatility and visibility to meet the varying requirements of degenerative and trauma procedures. Reform Ti features a titanium tulip, and triple lead thread to deliver strength, stability and efficiency to all thoracolumbar constructs. A more aggressive, self starting thread tip and a T25 drive feature allows for more immediate bone engagement, reliable insertion and maximum control during insertion.

*Discover the Difference*

Made in the USA

REFORM® TI PEDICLE SCREW

Polyaxial Screws provide 30° angulation in all planes for intraoperative flexibility

Modified Proximal Tapered Thread design increases bone screw interface, enhancing pull-out strength while reducing insertion torque

**Triple Lead Thread** allows for efficient screw delivery

Self Starting Thread Tip allows for more immediate bone engagement, reliable insertion

Low Profile Titanium Tulip increases space for fusion while decreasing potential risk of adjacent segment facet impingement

Hexalobular Drive Fittings on Bone Screw and Locking Cap reduces incidence of toggle and stripping

Square Threaded Locking Cap geometry reduces risk of cross threading

Full complement of offset connectors, dominoes, hooks and cross connectors increase procedure flexibility

Reform Ti Sizing

4.5mm Diameter	5.5mm Diameter	6.5mm Diameter	7.5mm Diameter	8.5mm Diameter	9.5mm Diameter
25mm	30mm	30mm	35mm	40mm	60mm
